

Absolutely. This is the **next document I would hand to the team**. Like the previous sections, I separate **Claude Design** (UX/UI) from **Codex** (backend/logic). This is now becoming the specification for the AI Writer module.

AI Writer — Guidance for Claude Design

Vision

AI Writer is **not a text editor**.

It is an **Enterprise Content Command Center**.

The user should feel like they are sitting beside:

- a senior copywriter
- an SEO expert
- a GEO expert
- a fact checker
- an editor
- a legal reviewer
- a marketer
- a monetization expert

Everything is happening simultaneously.

Overall Layout

Keep the current 3-column layout.

Top Toolbar

Left Sidebar	Main Editor	Right Sidebar
Outline	Draft	Chief Editor
Assets	Live Evidence	Recommendations
Checklist	Writing	Warnings
History		Quality

Do not redesign this.

It is excellent.

Final UX Philosophy

The writer should never ask:

"What should I improve?"

AGNUS should continuously answer that question.
