

Page name

Knowledge Sources

Purpose of page

This page controls **where AGNUS gets its knowledge from**.

It is not just a list of sources. It is the control panel for:

- APIs
 - RSS feeds
 - crawlers
 - official company sources
 - Google data
 - SEO tools
 - social signals
 - affiliate networks
 - internal analytics
 - custom sources
-

Menu placement

Keep the menu like this:

KNOWLEDGE

Knowledge Sources
Source Scoring
Knowledge Database
Knowledge Graph
Entity Manager
AGNUS Memory
Intelligence Timeline
Sync Logs

Do not create a separate “Integrations” menu for this.

Knowledge Sources handles the integrations that feed intelligence.

Knowledge Sources layout

Top section

Where AGNUS gets its knowledge.

The Brain never searches the internet directly.
It reads from configured sources, scored by trust, synced into the Knowledge Database.

Then show KPI cards:

Sources Connected: 53
Average Trust: 87/100
Last Full Sync: 14 min ago
Sync Errors: 1

Source group cards

Show groups:

Official Companies
Search Demand
News
Research
Developer Signals
Community Signals
Affiliate Networks
Marketplace Data
Internal AGNUS Data
Manual Sources

Each card should show:

Official Companies
10 connected
Trust 99/100
0 errors
Last sync 14 min ago
[Manage]

Source group detail page

When clicking **Official Companies**, show a table:

Source	Ingestion	Trust	Sync	Last Updated	Status	Used For	Action
OpenAI	API	100	15 min	15 min ago	Healthy	News, Pricing +5	View
Anthropic	API	100	15 min	15 min ago	Healthy	News, Pricing +3	View
Google AI	API	98	30 min	30 min ago	Healthy	News, Features +1	View

Columns must be:

Source
Ingestion
Trust
Sync
Last Updated
Status
Used For
Action

Source detail drawer

When clicking **View**, open a right-side drawer.

Do not navigate away.

Drawer header

OpenAI
Official Company Source
Trust 100
Status Healthy

Section 1 — Basic Source Settings

Fields:

Source name
Source group
Description
Owner
Status

Example:

Source name: OpenAI
Group: Official Companies

Description: Official model, pricing, release and documentation source.

Owner: System

Status: Active

Section 2 — Endpoints

Allow multiple endpoints.

Primary API endpoint

Documentation URL

Pricing URL

Blog / News URL

Changelog URL

Custom endpoint

Example:

Primary API: api.openai.com

Docs: platform.openai.com/docs

Pricing: openai.com/pricing

News: openai.com/news

Each endpoint should have:

Type

URL

Enabled / Disabled

Last checked

Status

Section 3 — Ingestion Type

Selectable chips:

API

RSS

HTML

Webhook

Crawler

GraphQL

CSV

Manual

Partner Feed

One source can have more than one ingestion type.

Section 4 — Authentication

Selectable chips:

None
API Key
OAuth
Bearer Token
Basic Auth
JWT
Webhook Secret

Do not display secret values openly. Show:

.....
[Reveal]
[Test connection]
[Rotate key]

Section 5 — Sync Settings

Fields:

Sync frequency
Retry policy
Timeout
Rate limit
Priority

Options:

Every 5 min
Every 15 min
Every 30 min
Every 1 hour
Every 6 hours
Daily
Manual only

Section 6 — Used For

Selectable chips:

News
Pricing
Features
Reviews
Comparisons
Marketplace
Academy
Business Guides
Keyword Discovery
Research Briefs
Knowledge Graph
AGNUS Brain
Entity Updates

Section 7 — Automation Rules

Rename **Allowed Actions** to:

Automation Rules

Rules:

Create draft automatically
Alert editor
Update entity database
Flag affected articles
Create Brain recommendation
Create Story Builder brief
Notify human reviewer
Requires human approval before publishing

Important: do not use “Publish automatically.”
Use:

Requires Human Approval

Section 8 — Trust & Scoring

Show:

Trust Weight: 100/100
Freshness: 95
Relevance: 100
Signal Strength: 90
Noise Control: 95

Final Source Score: 97

Allow editing only for admin users.

Section 9 — Data Coverage

Show what the source actually provides:

Pricing: 100%

Documentation: 95%

Models: 100%

Blog: 72%

Release Notes: 100%

API Updates: 100%

Videos: Disabled

Community: Disabled

Section 10 — Last Sync Summary

Example:

Last Sync

32 pages checked

4 changes detected

1 entity updated

12 articles flagged

0 failures

Confidence 99%

Section 11 — Health History

Example:

Today: Healthy

Yesterday: Healthy

7 days ago: Timeout recovered

30-day uptime: 99.98%
