

Absolutely. I actually think the **Knowledge Database** deserves one of the longest specifications because it is **the center of AGNUS**. Every other module (Research, Knowledge Graph, AI Writer, Topic Clusters, Publishing, Entity Manager, Marketplace, etc.) depends on it.

Claude and Codex should therefore build it as an **Enterprise Master Data Management (MDM) System**, not as a simple database viewer.

CLAUDE DESIGN GUIDELINES

AGNUS — Knowledge Database

Design Mission

Design the Knowledge Database as the **Living Brain of AGNUS**.

This page should not feel like a database.

It should feel like an intelligent system that continuously grows, verifies, connects, and explains knowledge.

The administrator should immediately understand:

- What AGNUS knows
- What AGNUS doesn't know
- How reliable the knowledge is
- Where it came from
- Where it is used
- What changed
- What needs updating

Everything should communicate that this is the single source of truth.

Overall Structure

Knowledge Database

↓

Entity Overview

Entity Explorer

Knowledge Relationships

Source Provenance

Knowledge Coverage

Connected Components

History

Recommendations

Actions

Section 1 — Entity Overview

Every entity begins with an executive summary.

Example

Claude

Entity ID
ENTITY-000421

Type
AI Assistant

Health
96

Confidence
98

Coverage
94%

Relationships
41

Sources
17

Connected Content
38

Last Updated
3 minutes ago

Status
Healthy

Large dashboard cards.

Enterprise feeling.

Section 2 — Knowledge Summary

AI-generated explanation.

Example

Claude is Anthropic's flagship AI assistant.

Verified through:

Official API

Documentation

Pricing

Developer Portal

Benchmarks

Latest update

Today

Coverage

94%

The administrator understands the entity immediately.

Section 3 — Knowledge Coverage

Beautiful coverage bars.

Pricing

100%

API

100%

Features

94%

Benchmarks

71%

Videos

43%

Case Studies

29%

Missing information is immediately visible.

Section 4 — Relationship Explorer

One of the biggest additions.

Beautiful interactive graph.

Example

Anthropic

Claude

Claude API

Pricing

Features

Prompt Engineering

AI Writer

Published Articles

Marketplace

Courses

Every node clickable.

Section 5 — Connected Components

Not only Connected Content.

Also show

Research Panel

Keyword Discovery

Topic Clusters

Story Builder

AI Writer

Human Review

Publishing Calendar

Knowledge Graph

Entity Manager

Memory

Marketplace

Academy

Recommendations

Administrator understands impact.

Section 6 — Data Provenance

Every field.

Expandable.

Example

Price

\$20

↓

Source

Anthropic Pricing API

↓

Verified

Today

↓

Confidence

100

↓

Verification Method

Official API

↓

Used By

17 articles

Everything explainable.

Section 7 — Timeline

Historical timeline.

January

Price updated

↓

March

API changed

↓

May

Vision released

↓

July

Context increased

↓

October

Enterprise launch

Beautiful timeline.

Section 8 — AI Recommendations

Panel.

Recommendations

Pricing changed

Update comparisons

Refresh articles

Update affiliate links

Rebuild entity graph

Section 9 — Missing Knowledge

Extremely valuable.

Example

Missing

Enterprise pricing

Case studies

Security certifications

Videos

Benchmarks

Partner ecosystem

Now AGNUS knows what to collect.

Section 10 — Impact Analysis

If this entity changes.

Show

Affected

34 articles

7 comparisons

12 clusters

5 marketplace pages

19 Story Builders

42 AI recommendations

Everything visual.

Section 11 — Compare Entities

Beautiful comparison mode.

Compare

Claude

vs

ChatGPT

vs

Gemini

vs

Mistral

Show
