

Guidance for Claude Design

Overall vision

The title is excellent:

Evidence before words.

Keep it.

But underneath, the user should immediately understand:

"Everything the AI writes is backed by evidence that I can inspect."

1. Add Research Summary Cards

Above the source list add:

Research Summary

Sources collected	18
Official sources	6
Community sources	5
Research papers	2
Average trust	94%
Conflicts detected	1
Missing evidence	2

This instantly tells the editor whether the research is strong or weak.

2. Organize sources into groups

Instead of one long list:

Official Sources
OpenAI
Anthropic
Microsoft

Research Papers
MIT
Stanford

Industry Analysis
McKinsey
Gartner

Community
Reddit
YouTube

Reviews
G2
Capterra

Competitors
...

News
...

The human brain scans grouped information much faster.

3. Every source should expand

Instead of only:

OpenAI Documentation
Official

Clicking it should expand.

Example:

OpenAI Documentation

Trust 100

Last updated
Yesterday

Evidence extracted

- GPT pricing updated

- New Responses API
- New Agents SDK

Entities affected

GPT-5
Responses API
Pricing

Articles affected

12

Knowledge Graph

Updated

Confidence

99%

This makes Research Panel feel alive.

4. Add Evidence Extraction

One of AGNUS's strongest differentiators.

Example:

Evidence Found

- ✓ GPT pricing changed
- ✓ API endpoint updated
- ✓ New feature announced
- ✓ Documentation revised
- ✓ Release note
- ✓ Benchmark added

Instead of making users read entire sources.

5. Add Contradiction Detection

Very important.

Example

Research Health

17 sources agree

1 contradiction detected

The Verge reports...

OpenAI docs state...

Review required.

This is where AGNUS becomes intelligent.

6. Add Entity Detection

Show automatically

Detected Entities

GPT-5

Responses API

Pricing

OpenAI

Agent SDK

Embeddings

Clicking an entity opens its Knowledge Database page.

7. Add Source Timeline

Research Timeline

Yesterday

Pricing changed

Today

Documentation updated

1 hour ago

YouTube review published

45 min ago

Reddit discussion exploded

This helps editors understand the evolution of the topic.

8. Add Research Completeness

One progress bar

Research Completeness

 91%

Official docs

✓

Independent reviews

✓

Community

✓

Videos

✓

Academic

✗

Legal

✓

Now editors know if research is sufficient.

9. Add Citation Preview

The AI Writer will later cite these.

Show

Generated Citations

OpenAI Docs

Anthropic Docs

Google AI Blog

G2 Reviews

Reddit

YouTube

10. Add Actions

Each research session should allow

Refresh Research

Add Source

Export Brief

Generate Research Brief

Send to Story Builder

Approve Research
