

What is Story Builder?

This page answers ONE question:

"Before we spend time writing, what exactly are we building, why are we building it, and what is the best possible version of this article?"

The AI Writer should never think.

Story Builder does the thinking.

AI Writer only executes.

Think of Story Builder as the architect.

AI Writer is the construction company.

Current flow

Current:

Topic

↓

Keyword

↓

Research

↓

Angle

↓

Outline

↓

Draft

Good...

but incomplete.

The real AGNUS Story Builder

I would redesign it into this:

Opportunity

Topic

Business Goal

Keyword Strategy

Search Intent

Audience

Research

Entities

Competitors

Questions

Content Angle

Monetization

SEO Strategy

Internal Links

Outline

Approval

Send to AI Writer

This becomes enterprise level.

Why?

Because writing starts long before writing.

Example

User chooses

Best AI Tools for Restaurants

Story Builder should immediately ask

What business objective?

Traffic

Affiliate

Authority

Leads

Newsletter

Marketplace

Academy

Brand Awareness

Because different objectives

produce different articles.

Search Intent

Not manually.

Automatically.

Commercial

Informational

Transactional

Comparison

Navigational

Mixed

AI suggests.

User can override.

Audience

This is missing.

Restaurant Owner

IT Manager

Marketing Agency

Developer

Small Business

Enterprise

Beginner

Advanced

Everything changes depending on audience.

Keyword Strategy

Not just

Primary keyword.

Should include

Primary

Secondary

Semantic

Voice Search

Question Keywords

Entity Keywords

Location Keywords

Long Tail

Featured Snippet

People Also Ask

Automatically suggested.

Research

Not simply

Sources.

Instead

Official Sources

Community

Academic

News

Competitors

YouTube

Reddit

Forums

Internal Knowledge

Knowledge Graph

Everything collected.

Entity Builder

This is HUGE.

Every article should know

OpenAI

GPT-5

ChatGPT

Claude

Anthropic

Google Gemini

Restaurant

CRM

POS

Voice AI

Those become entities.

Automatically linked later.

Competitor Analysis

Story Builder should compare

Top 10 pages.

Example

Competitor 1

Missing pricing

Weak examples

Outdated

Competitor 2

Good screenshots

Poor FAQ

Competitor 3

No schema

Then

AGNUS builds

a better article.

Questions

Automatically collect

People Also Ask

Reddit

Quora

Support Forums

Search Console

Voice Search

Now FAQ is automatic.

Angle

Current

Choose angle

Too simple.

Should become

Teaching

Buying Guide

Comparison

60%

Potential

100%

Final guidance for Claude Design

Redesign Story Builder as the strategic planning center of AGNUS rather than a simple step-by-step wizard. Keep the horizontal progression because it is intuitive, but enrich every step into a professional workspace with contextual data, AI recommendations, actions, previews, version history, and validation. Add a persistent summary sidebar showing business goal, opportunity score, research quality, entities, SEO health, expected traffic, expected revenue, and readiness. Each stage should feel like a decision point where AGNUS explains *why* a recommendation is made, not just *what* the next step is. The page should communicate that no article reaches the AI Writer until strategy, research, business objectives, and content architecture have been fully approved.

For Claude Design

Purpose

Story Builder is not a simple article form.

It is the **strategic planning center** before AI Writer.

It answers:

“What are we building, why are we building it, who is it for, how will it rank, how will it make money, and what structure should the AI Writer follow?”

Keep

Keep the horizontal step flow, but expand it.

Use this final step structure:

1. Opportunity
2. Topic
3. Keyword Strategy
4. Audience & Intent
5. Research
6. Entities
7. Competitors
8. Questions
9. Angle
10. Monetization
11. SEO / GEO
12. Internal Links
13. Outline
14. Approval
15. Send to AI Writer

Page layout

Use a 3-part layout:

Top:

Progress steps

Center:

Current step workspace

Right sidebar:

Strategic Summary + Chief Editor suggestions

Right sidebar should always show

Opportunity score

Primary keyword

Cluster

Audience

Search intent

Research trust

Entities detected

Competitor gap

Expected traffic

Expected revenue

Monetization path

Readiness %

Step 1 — Opportunity

Let user start from:

AGNUS Brain recommendation

Keyword Discovery opportunity

Intelligence Feed story

Topic Cluster gap

Manual idea

Competitor page

Entity

Buttons:

Use opportunity

Search opportunities

Add manual idea

Step 2 — Topic

Show:

Topic title

Source of topic
Cluster match
Why AGNUS recommends it
Business reason

Example:

Best AI tools for restaurants
From Keyword Discovery
Cluster: Restaurants
Opportunity: 8.7
Reason: commercial intent + affiliate value + cluster gap

Step 3 — Keyword Strategy

Do not show only one keyword field.

Show:

Primary keyword
Secondary keywords
Semantic keywords
Voice search questions
AI search phrases
Long-tail keywords
People Also Ask
Entity keywords

Actions:

Expand keywords
Refresh keyword data
Open Keyword Discovery
Accept strategy

Step 4 — Audience & Intent

Show:

Audience
Search intent
Knowledge level
Buyer stage
Tone
Goal

Options:

Beginner

Professional
Enterprise
Business owner
Developer
Agency
Executive

Intent:

Informational
Commercial
Transactional
Comparison
Tutorial
Buying guide
Local

Step 5 — Research

Show research quality:

Sources collected
Official sources
Community sources
Reviews
Competitors
Average trust
Contradictions
Missing evidence

Actions:

Collect research
Refresh research
Open Research Panel
Approve research

Step 6 — Entities

Show detected entities:

Companies
Products
Models
People
Industries
Features
Pricing
Tools

Actions:

- Add entity
- Remove entity
- Open Entity Manager
- Confirm entities

Step 7 — Competitors

Show:

- Top competing pages
- What they cover
- What they miss
- Content weakness
- Backlink strength
- Freshness
- Schema
- FAQ coverage

Actions:

- Scan competitors
- Compare outlines
- Find gaps
- Use gaps in outline

Step 8 — Questions

Show:

- People Also Ask
- Reddit questions
- Voice questions
- Search Console questions
- Forum questions
- Customer questions

Actions:

- Add to FAQ
- Add to outline
- Ignore

Step 9 — Angle

Show possible article angles:

- Buying guide

Comparison
Review
Tutorial
Business guide
Case study
Checklist
Marketplace collection
Academy lesson
News analysis

Each angle should show:

Best for
Expected traffic
Expected revenue
Difficulty
Recommended or not

Step 10 — Monetization

Show:

Affiliate products
Marketplace items
Lead form
Consultation CTA
Newsletter CTA
Academy course
Premium upgrade
No monetization

Actions:

Select CTA
Add affiliate products
Connect marketplace
Connect academy

Step 11 — SEO / GEO

Show:

SEO title
Meta description
Slug
Schema
Featured snippet target
AI Overview target
GEO answer blocks

FAQ schema
Comparison schema
Review schema

Actions:

Generate SEO
Optimize for Google
Optimize for AI search
Approve

Step 12 — Internal Links

Show:

Links to pillar article
Links to supporting articles
Links to reviews
Links to comparisons
Links to marketplace
Links to academy
Missing links
Anchor text

Actions:

Auto-link
Review links
Open cluster
Approve links

Step 13 — Outline

This is not only headings.

Each section should contain:

Heading
Purpose
Evidence needed
Entities
Keywords
Internal links
CTA
Media
Schema
Notes for AI Writer

Actions:

Generate outline
Regenerate
Compare versions
Approve outline

Step 14 — Approval

Show final checklist:

Opportunity approved
Keyword strategy approved
Audience approved
Research approved
Entities approved
Competitors reviewed
Questions selected
Angle approved
Monetization approved
SEO approved
Internal links approved
Outline approved

Only then enable:

Send to AI Writer

Final design rule

Story Builder should visually communicate:

“AGNUS does not start with a prompt. AGNUS starts with a strategy.”
